

Codling Moth Spray Timing Information, First and Second Generations

At the “End of First Gen.” wait to spray again until the start of the second generation. Starting at the beginning of the second generation egg hatch, codling moth larvae can potentially enter fruit throughout the second and third generations, with very little “gap” in between. With this in mind, we recommended applying treatments at regular intervals (depending on the insecticide you are using) to protect fruit up to September 15. Or at the bare minimum, keep fruit protected during the “period of greatest egg hatch” for each generation.

| County | Location | First Generation | | Second Generation | | |
|---------------|-------------------------|------------------------------|------------------|--------------------|------------------------------|----------------|
| | | Period of Greatest Egg Hatch | End of Egg Hatch | Start Sprays Again | Period of Greatest Egg Hatch | Egg Hatch Ends |
| Box Elder | Perry | May 29 - June 15 | July 1 | July 11 | unknown | unknown |
| | Tremonton | June 2 - June 24 | July 6 | July 14 | unknown | unknown |
| Cache | River Heights | June 3 - June 25 | July 9 | July 17 | unknown | unknown |
| Carbon | Price Airport | May 28 - June 13 | June 27 | July 5 | July 16 - unknown | unknown |
| Davis | Kaysville | May 28 - June 14 | June 28 | July 6 | July 7 - unknown | unknown |
