

Peach Twig Borer, First and Second Generations

The first generation egg hatch ends at the date under the column, “Keep Fruit Protected Up To.” Between the date in this column, and the dates in the column, “Start Date Range” for Second Generation, there is no need to do anything. For the second generation, apply two cover sprays where damage was bad last year (starting at the earlier date). Otherwise, for locations with minimal damage, apply one cover spray at the later date in that range.

County	Location	First Generation		Second Generation	
		Start Spray Date	Keep Fruit Protected Up To	Start Spray Date Range	Keep Fruit Protected Up To
