

Codling Moth Spray Timing Information, First and Second Generations

At the “End of First Gen.” wait to spray again until the start of the second generation. Starting at the beginning of the second generation egg hatch, codling moth larvae can potentially enter fruit throughout the second and third generations, with very little “gap” in between. With this in mind, we recommended applying treatments at regular intervals (depending on the insecticide you are using) to protect fruit up to September 15. Or at the bare minimum, keep fruit protected during the “period of greatest egg hatch” for each generation.

County	Location	First Gen.	Second Generation		
		End of Egg Hatch	Start Sprays Again	Period of Greatest Egg Hatch	Egg Hatch Ends
Box Elder	Perry	June 15	July 2	July 22 - Aug 4	unknown
	Tremonton	June 24	July 10	July 28 - Aug 9	unknown
Cache	River Heights	June 26	July 11	July 30 - unknown	unknown
