

## Codling Moth Spray Timing Information, First and Second Generations

After the date shown under “First Gen. End of Egg Hatch,” the fruit does not need to be protected, so you will wait to apply your next spray at the start of the second generation. Then, note that codling moth larvae can potentially damage fruit from that time to the end of the season. (There will be a very short “gap” between second and third generations). With this in mind, we recommended applying treatments at regular intervals (depending on the insecticide you are using) to protect fruit up to September 15. Or at the bare minimum, keep fruit protected during the “period of greatest egg hatch” for each generation.

County	Location	First Gen.	Second Generation		
		End of Egg Hatch	Start Sprays Again	Period of Greatest Egg Hatch	Egg Hatch Ends
<b>Box Elder</b>	Perry	July 6	July 15	July 26 - unknown	unknown
	Tremonton	July 10	July 18	unknown	unknown
<b>Cache</b>	River Heights	July 11	July 19	unknown	unknown
<b>Carbon</b>	Price Airport	June 29	July 8	July 19 - unknown	unknown
