

Peach Twig Borer, First and Second Generations

- Apply the first spray based on the injury level at your site for the prior year (high or low).
- Typically, only one application is needed in the first generation.
- The column that says “Keep Fruit Protected Up To” is the end of the first generation egg hatch. Between the date in this column, and the date in the “2nd Gen. Start Spray Dates”, there is no need to apply an insecticide for PTB.
