

## Peach Twig Borer, Second and Third Generations

For each of second generation and third generations, apply two cover sprays where damage was bad last year (starting at the earlier date). Otherwise, for locations with minimal damage, apply one cover spray at the later date in that range.

Stop protecting fruit by harvest or September 15, whichever is earlier.

County	Location	Second Generation		Third Gen.
		Spray Date Range	Keep Fruit Protected Up To:	Spray Date Range
Box Elder	Perry	July 18 - 21	August 15	unknown
